

LOW MAINTENANCE LANDSCAPE inc.

DESIGN SERVICES

Have you been dreaming of a beautiful landscape, but haven't taken the steps to find the right landscape design service for your needs? We pride ourselves in customer relations; our #1 goal is to give YOU exactly what YOU want at a price your budget can afford. The newest movement in landscape architecture is self-sustainable, low maintenance landscaping. How can a landscape be "low maintenance", still provide beauty year round, and last for decades? The answer is simple: an intelligent, well thought design that uses superior plant varieties and "cutting edge" construction techniques is all it takes! This can save YOU, the homeowner thousands of dollars over the years and is friendlier for our environment. We utilize this increasingly popular idea in every design and installation. We maintain a low overhead operating cost and are therefore able to design and install your landscape for less than you think!

HERE'S SOME ADVANTAGES OF CHOOSING OUR COMPANY !

- **SMART DESIGN:** Our designs are partially based on the maintenance level you are comfortable with. We are concerned about the long-term success of your landscape. We take into consideration all micro-climate (sun, wind, soil, water) factors, and aesthetic (color, texture, form, contrast) factors.
- **DESIGNING WITHIN A PROPOSED BUDGET:** A common problem in the landscape industry is the failure of the designer to meet the customers long term needs. The finished design is often too expensive to install or too intensive to maintain. We work from the beginning to avoid this!
- **DESIGN QUESTIONNAIRE:** This allows us to get all of the pertinent information about your needs and desires in landscape. We have found that a 10-minute questionnaire is a valuable part of our design process. We are one of the few companies that offer this service.
- **CONCEPTUAL DESIGN:** Our conceptual designs give you an idea of what the final plan will look like. This is a good time to make changes or revisions.
- **PLANT PREVIEW:** We show our clients a picture of every plant we specify in our designs. This gives you an idea of what the plant will look like in your landscape.
- **COMPUTER AIDED DESIGN:** With our state of the art CAD software, we produce professional quality designs. An important advantage to computer-aided design is the ability to make changes and revisions at a later time. Computers also allow us to keep costs down and save you money!
- **SPECIAL GARDENS:** We can design a special garden or entire landscape based on a theme. Japanese gardens, water gardens, rock gardens, cut flower gardens, butterfly & wildlife gardens, ect.
- **BEAUTIFUL RENDERING:** All of our designs can be vividly colored. As you can see in our brochure, a rendered plan really brings out the design elements and allows the client to see color and special relationships more clearly. An artistic, full color, rendered plan can be produced for an extra fifty to one hundred dollars depending on the project.
- **PERSPECTIVE DRAWINGS:** We offer realistic perspective drawings that show how your landscape will look when it matures. Please inquire about the extra costs for this service.
- **DESIGN FEES:** Our design fees range from one hundred to one thousand dollars, depending on the size and complexity of the project. 25% is returned after installation.

Call **Ryan Domnick** at **Low Maintenance Landscape** today to discuss a design that is right for you; free initial consultation & estimates. We specialize in customer satisfaction, high quality, and have our ability to meet any budget!
